OBJECTIVE

Design and build scalable Applications/Websites using **React JS**, **Express JS**, and **Node.js**. Can handle database using **MongoDB** and create dynamic client-side functionality with React. Ensure data security and privacy. Implement RESTful APIs and web sockets. Optimize performance and reliability. Collaborate with teams to deliver high-quality MERN stack solutions. Stay updated with industry trends and best practices.

EDUCATION

AMBALIKA INSTITUTE OF MANAGEMENT AND TECHNOLOGY **2022 - 2025**

. Bachelor of Technology (B.Tech) in Computer Science & Engineering

FEROZE GANDHI POLYTECHNIC RAEBARELI **2017 - 2020**

. Diploma in Infomation Technology | 76.2%

SPN INTER COLLEGE TILOI AMETHI **2017**

. 12 th Up board Maths | 72.4%

SPN INTER COLLEGE TILOI AMETHI **2015**

. 10 th Up board Maths | 79.6%

SKILLS

- Full Stack Web development.
- Familiar with HTML, CSS, JavaScript, Bootstrap, ReactJs, NodeJs, MongoDB
- Java Development

WORK EXPERIENCE

Summer Internship | MERN Stack

. At Softpro India

Internship | Web Development

. At InternPe

PROJECTS

Gavai Swad (e-commerce app)

Created an app named Gavai Swad using MERN Stack Technology, in which I used React to create Frontend part and ExpressJS & MongoDB for Backend part. This app is related to an e-commerce app which provides natural and organic products. There are several components in this project like- An User Interface like Homepage where user can visit and see the products then user can Add to cart the products and increase the quantity of product or can also remove the product from cart.

Resume Builder

Create a Resume Builder project as mini project in my college using HTML, CSS and Javascript in which, user can fill data of given fields and project will create a appropriate resume for them They can also edit the details.

BookPortal

Create a BookPortal project using MERN technology, in which an user can visit to the website where user can fill Book's details and that data will store on the database(**MongoDB**) and user can also edit the filled data later using **Edit** button or can also delete any particular filled data record using **Delete** button. This project is based on the idea of BookPortal where data can be stored, edited and also can be deleted. This project is a virtual form of Book records.

Portfolio

A visually engaging and interactive portfolio built with HTML, CSS, and JavaScript. This collection demonstrates my skills in crafting web designs, implementing dynamic functionalities, and optimizing user experiences. Portfolio is a visual representation of my own details about my education, my expertise and projects developed by me.

TRAINING

Summer Training -

Project Based Summer Internship in JAVA from June 12th 2019 to August 10th 2019 conducted at Raebareli learning Centre of MTA India.

STRENGTHS

- Always oriented towards my goal.
- Can do better under pressure.

HOBBIES

- Making Friends.
- Helping Others.

DECLARATION

- I hereby declare that above information is true to best of my knowledge.

Place : Lucknow
